

## Project Management Learnership

### Programme Overview

A learner who has achieved this qualification will be able to integrate leadership knowledge and skills with those of customer service and the operational specifics of a given context. This qualification has been developed for professional practice across the service industry and is intended to professionalise supervisory, junior management and other leadership positions in the service industry, ensuring the upliftment of standards in general

### Learning Outcomes:

Contribute and provide assistance to a project's scope, life cycle activities and the effective execution of the project plan by applying the correct range of project management tools and ensuring project work is carried out according to plan.

Support the implementation of the project plan in response to outcomes evaluated and assessed; and provide related inputs to keep the project on track.

Perform administrative duties related to the project and documentation requirements and administer project meetings and workshops.

Contribute to project financial management issues related to cost budgets for an element of work.

Work with and support team project members working on the designated project.

Perform procurement duties related to the project undertaken.

Supervise a project team and implement a range of procedures and systems related to one of the following types of projects; developmental, technical or business.

The programme will be offered as a block release comprising of five modules, each delivered as one week full time attendance block and incorporating self-study, assignment writing, workplace experience and monitoring.

### Accreditation

For award of the qualification, a candidate must successfully complete each unit standard. In addition, candidates must demonstrate the ability to engage in supportive functions in an integrative way, dealing with divergent and "random" demands effectively.

Total Credits: 136
